CORE COMPETENCIES

Bohning is a 75+ year old Michigan based engineering and manufacturing firm of outdoor products. The **ADK-3 in 1** Ice Rescue Tool is built and engineered for ice rescue professionals. The **ADK-3 in 1** is an ice spud, a measurement tool for ice, and it can be used as an anchor point for ice rescues. The spud has a serrated edge which cuts quickly and easily through the toughest ice, and is not only used to create holes in the ice, but can also be used in accessing the ice for safety. The laser engraved measurements on the shaft allow you to quickly estimate the amount of ice once the hole is spudded. It's constructed of USA steel and is made with the ice rescue professionals in mind. A mountain tough tool that can be stored, transported and ready for action in under 30 seconds is a key to saving lives. It comes in a sturdy vinyl case in 2 pieces and is connected by an easy release clevis pin. With an internally stored cinch stick, the tool can be deployed and anchored to the ice and it will not budge from its place, allowing the ice rescue teams to safely retrieve the victim from the water. Visit our website to watch video demonstrations.

DIFFERENTIATORS

- Ease of use and stored with it's 2 piece design
- Heavy duty serrated spud (can be sharpened)
- Weighted end for easy implementation and removal
- T-handle for a sure grip
- Welded anchor point
- Heavy duty tool roll included
- 75+ years of engineering & manufacturing outdoor equipment

Past Performance

- Easton Technical Products—Have supplied them with millions of urethane vanes for arrow production starting in 2007 to present day
- Rec Boat Holdings— Supply stainless steel canopy anchor points, 2021 to present day
- Dairy Cow Hoof Trimmers across the USA—Supply dairy cow hoof blocks to aid in cow ulcer recovery, 2020 to present day
