

# THE ADK - 3 IN 1 ICE RESCUE TOOL

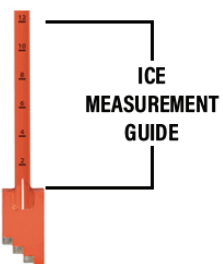

The **ADK - 3 in 1** is an ice spud, a measurement tool for ice, and it can be used as an anchor point for ice rescues, it is engineered and built for ice rescue professionals.

- 2-Piece Compact design
- Heavy-Duty Serrated Spud (Can be sharpened)
- Weighted End for Easy Implementation and Removal
- T-Handle for a Sure Grip
- Welded Anchor Point
- Heavy Duty Tool Roll Included

**SPUD:** This tool features a steel, stepped, spud design. The serrated edge cuts quickly and easily through the toughest ice. The ADK - 3 in 1 tool can be sharpened and maintained to ensure the tool can be deployed quickly and easily.

The spud creates holes in the ice for upper handle / anchor anchoring in addition to accessing ice safety.

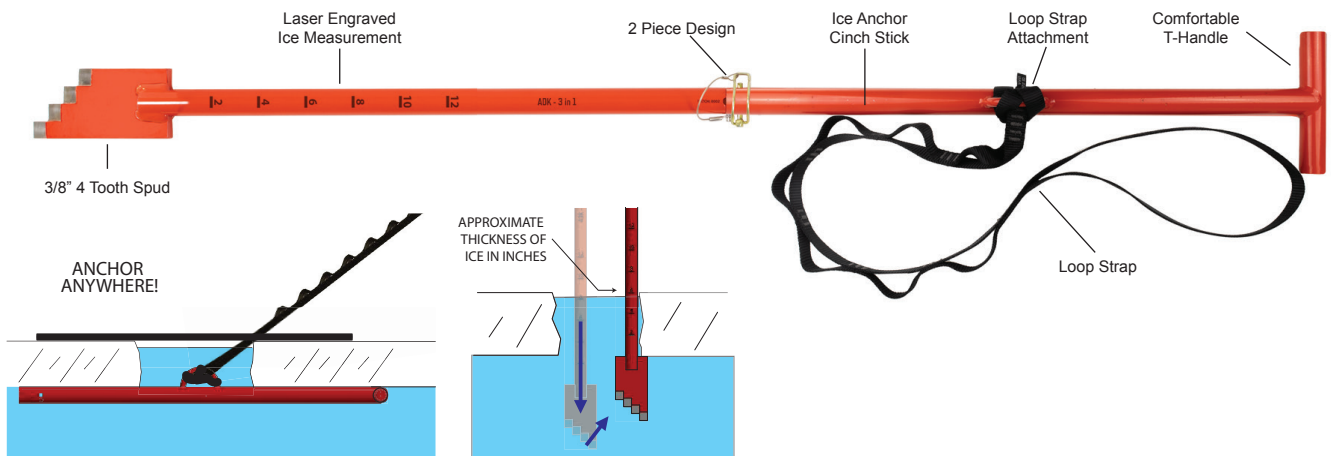

**MEASURE:** Laser engraved measurements on the shaft of the ADK - 3 in 1 allow you to estimate the amount of ice. After spudding the hole, place the edge of the spud under the ice to get a quick reference for how much ice is present. Knowing how thick the ice may be the difference between a successful rescue and failure.

**RESCUE:** Constructed of steel in the USA, the ADK - 3 in 1 is made with Ice Rescue Professionals in mind. A mountain tough tool that can be stored, transported, and ready for action in under 30 seconds is key to saving lives when an ice rescue is needed. The ADK - 3 in 1 comes in a sturdy vinyl-covered polyethylene case in 2 pieces and is connected by an easy-release clevis pin. With an internally stored cinch stick, the tool can be deployed and anchored to the ice and it will not budge from its place, allowing for ice rescue teams to safely retrieve the victim from the water. Watch our videos on how quickly and efficiently the tool can be used.

# ADK - 3 IN 1: PARTS LIST & MATERIALS

#	DESCRIPTION	MATERIAL
1	4-Tooth Spud Blade	A36 Steel - (3/8" Thick)
2	Lower Spud Attachment / Ice Thickness Gauge	A513-T5 Dom. Steel 1 1/8" OD x .109" Wall (0.907" ID)
3	Ice Anchor / Upper Handle	A513-T5 Dom. Steel 1 1/8" OD x .109" Wall (0.907" ID)
4	5/16" OD Nylon Unthreaded Spacer	Nylon 6/6
5	6" Lanyard	Stainless Steel
6	Tethered Wire-Lock Clevis Pin	1004-1045 Steel - Zinc Plated
7	Cinch Stick / Metal Cleat	ABS / Stainless Steel
8	Loop Strap	Nylon
9	Protective Sheath	Impact Resistant Polymer
10	Loop Strap Attachment Point	3/8" Welded Steel D Ring
	Powder Coat	RAL 3020 Traffic Red
